RADIANT GAS FIREPLACE

A versatile fireplace
with a V-Class fire.

valor

Why Choose

Feel the heat.

All our gas fireplaces radiate heat. Like feeling the sun on your skin. The best kind of heat there is.

Heater-rated

Our fireplaces are rated with space heaters so we put Radiant Heat Technology into every fire. You can feel it.

Works quietly.

We designed our gas fireplaces to move the heated air via natural convection at the rate of 120 cubic foot per minute—no need for a noisy blower.

Stainless Steel burner

Our precision stainless steel burners don't rust, and create an enhanced flame and ember glow that produces radiant heat.

Efficiency

Valor fireplaces are heater-rated. Our Radiant Zone Heating is up to 25% more efficient than central forced air systems.

H3 ON COVER:

4-SIDED VINTAGE IRON FRONT 1041FSV

BLACK BACKING PLATE 1040BPB

PLAIN BLACK LINER 1060PBL

BIRCH 1000BLKV2

A Valor?

Improving heat.

Our exclusive *Secondary Heat Exchanger* and our aerodynamic firebox naturally improve convective heat—without a fan.

Ceramic glass window

Valor's durable and robust ceramic glass window improves radiant performance by absorbing and distributing radiant heat.

No power?

No problem. All Valor gas fireplaces run on 4 AA batteries as the primary source of power—not as back-up power like other brands. And you'll save money on your electrical bill.

Outdoor-friendly.

All Valor gas fireplaces are rated for outdoors under a covered patio and use quality materials that exceed the requirements for outdoor use.

Logs provide heat.

High definition, low mass fiber ceramic logs heat up and glow quickly. We harness the radiating heat from our logs, just like real logs.

Built to last.

Our aluminized steel fireboxes handle high temperatures, delivering efficient radiant warmth. Our baked-on powder-coated paint offers a better texture and a more durable finish.

Safety

We put our fires through rigorous safety testing in our in-house CSA approved lab. We provide a screen with every fireplace to keep you and your loved ones safe.

Design your own.

Visit the Valor Fireplace Design Center to design your very own Valor Fireplace today.

FINISHES

Our H3 fronts feature three finishes: the versatile Vintage Iron and elegant Black, both powder-coated for longevity; or, Brushed Champagne, a plated brass. If available, ask your dealer to see an example in person.

BRUSHED CHAMPAGNE

VINTAGE IRON

BLACK

The Remote Battery and Wall Switch comes standard, giving you easy access to your fireplace's receiver batteries.

Child Proof your remote for safety and ease.

Set the temperature for specific times of the day.

Accurately knows the current temperature of your room.

Set the timer to turn the fireplace off up to 9 hours ahead.

Program your fireplace to turn on and off when you want at the temperature you want.

VALOR 10 REMOTE

The H3's interactive remote has up-to-the-moment information on the state of your fireplace, and lets you select, adjust or program your desired temperature—automatically adjusting the fire to maintain the room temperature. You can even turn your pilot light on or off from the comfort of your sofa.

ZERO CLEARANCE (ZC)

Always a great addition to your new home or major renovation.

HEAT SHIFT™

HeatShift also available with a hidden valance.

KEEPS WALL COOLER

Pioneered by Valor, our unique HeatShift System naturally circulates up to 125 cubic feet of convective heat per minute through hidden ducts and back into the room—avoiding surface areas above the fireplace.

DESIGN FLEXIBILITY

Run standard finishing materials right up to the fireplace surround, including drywall, wood, tile and stone.

Install mantels lower than usual at a one-to-one ratio of depth to height from the fireplace surround.

TRADITIONAL LOGS 1000LSKV2
CHARCOAL BRICK LINER 1065CBL
3" VINTAGE IRON FRONT 1041FSV
BACKING PLATE 1040BPB
HEATSHIFT LDK8, LDK10 and LDK11

IMPROVES PERFORMANCE

Harnessing convective warmth, up to 60% of fireplace heat rises and flows through HeatShift and back into the room. The remaining radiant heat emanates from the fireplace, keeping you warm.

CONSTRUCTION MADE EASY

Unlike many competitor products, HeatShift is built and designed in North America for North American homes, meeting building code requirements.

NO ELECTRICITY REQUIRED

HeatShift circulates heat naturally using gravity and Valor product ingenuity—no need for a fan or electricity. No power—no problem. Valor fully ducts HeatShift for clean, safe air quality.

TRADITIONAL LOGS 1000LSKV2
RED BRICK LINER 1010VRL
3" VINTAGE IRON FRONT 1041FSV
BACKING PLATE 1040BPB-RC

ENERGY EFFICIENCY

EFFICIENCY RATINGS

While the North American fireplace industry is largely self-regulated, at Valor we use recognized Canadian and US government testing methods to determine our energy efficiencies, and ensure our products perform in your home as rated. All our fireplaces are available as natural gas or propane.

SECONDARY HEAT EXCHANGER

The built-in Secondary Heat Exchanger naturally improves convective heat—removing the need for a fan. Your fire will heat up fast for immediate comfort—and with no need for electricity, you'll save money.

DIMENSIONS

FRAMING AND VENTING

ZC

Between underside of header and base of heater.
Base of heater must be at finished hearth height.
However, please note that the 1040BPB 4-sided backing plate extend 1/4" below the base of heater.
Increase cavity height accordingly.

1/2" thick non-combustible board required above engine (not supplied).

NOTE: This unit requires a solid platform to support it. Combustible framing allowed beneath fireplace.

A hearth is not required. However, if installing a hearth, consider the following:
3-sided backing plates are flush with hearth;
4-sided backing plate position 1/4" below bottom of appliance.

26-5/8" between underside of non-combustible board and base of heater.

ZC REDUCED CLEARANCE

NOTE: This unit requires a solid platform to support it. Combustible framing allowed beneath fireplace.

Between underside of header and base of heater.
Base of heater must be at finished hearth height.
However, please note that the 1040BPB-RC 4-sided backing plate extend 7/8" below the base of heater.
Increase cavity height accordingly.

A hearth is not required. However, if installing a hearth, consider the following:
3-sided backing plates are flush with hearth;
4-sided backing plate position 7/8" below bottom of appliance.

ALWAYS REFER TO THE
MANUAL FOR COMPLETE
INSTALLATION INSTRUCTIONS.

HOMEOWNER

INSTALLER

COAXIAL AND COLINEAR VENTING

The maximum vertical vent run on an H3 cannot exceed 40 feet in total length. The engine can be either top or rear vented.

BACKING PLATES

ZC HEATSHIFT COMPATIBLE

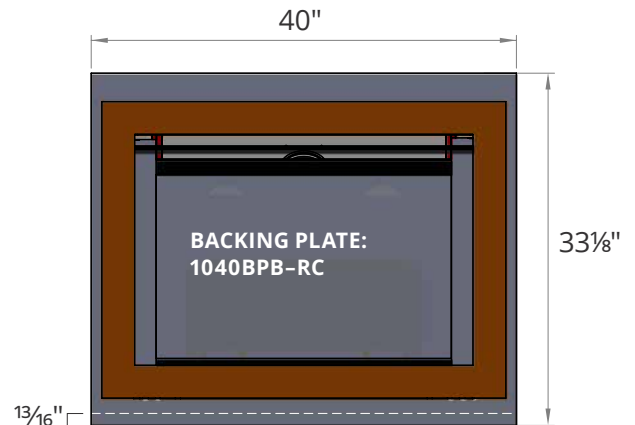

These standard Zero Clearance (ZC) backing plates are typically smaller and made for framing a new fireplace where non-combustible materials are required directly above the unit. The ZC backing plates are compatible with HeatShift.

4-SIDED
Backing Plate
overhangs bottom
of appliance.

ZC REDUCED CLEARANCE

These larger ventilated reduced clearance (RC) backing plates allow tighter framing dimensions than standard ZC plates—ideal when replacing wood or gas fireplaces or preserving existing wall finishes or framing. The Reduced Clearance backing plates are not compatible with HeatShift.

3-SIDED
Backing plate sits flush
with bottom of appliance.

Don't want a backing plate?
Consider the Clean Install
Kit for a minimalist look
that allows you to tile or
finish right up to the edge
with a clean finish.
